## PROJECTS

**Music play list manager-** It is done by using linked list that comes under DSA

**Restaurant billing system**-The objective of the restaurant billing system in C++ is to create a program that allows users to select items from a menu, place orders, and calculate the total bill based on the items ordered and their quantities. The system should be able to display the menu, take orders, and provide the total bill amount. It should also handle various scenarios such as invalid inputs and provide a user-friendly interface for interacting with the billing system.
